Index to ASTRONAUTICS Vols. 2-3

(August 1957 through December 1958)

SUBJECTS

AMATEUR ROCKETRY:
- Aid for basement rocketeers, Feb. 1958, p. 23.
- Educating youthful rocketeers, July 1958, p. 39.

ARPA:
- National astronautical program begins to take shape, July 1958, p. 20.
- Round-up, July 1958, p. 20.

ARS:
- 1957 Annual meeting number, Dec. 1957.
- ARS urges national space flight program, Jan. 1958, p. 18.
- 10,000th Member, Nov. 1958, p. 36.
- Thirteenth time out, Nov. 1958, p. 38.
- 1958—A year of growth, Nov. 1958, p. 44.

ASTRONAUTICS:
- It's really empty space, Sept. 1957, p. 27.
- Why not astronautical engineers?, Sept. 1957, p. 52.
- Anthropology of astronautics, Nov. 1957, p. 26.
- Eighth International Astronautical Congress, Nov. 1957, p. 36.
- First look at American IAF papers, Nov. 1957, p. 36.
- Why astronautical engineers?, Nov. 1957, p. 38.
- Synthetic atmospheres for space ships, Nov. 1957, p. 48.
- Space flight goes to school, Dec. 1957, p. 44.
- ARS urges national space flight program, Jan. 1958, p. 18.
- Solid propellants and the conquest of space, Jan, 1958, p. 39.
- Human factors and space cabins, Jan. 1958, p. 42.
- Society and space exploration, Feb. 1958, p. 20.
- Flight space and the satellites, March 1958, p. 32.
- Legal aspects, March 1958, p. 32.
- Definition, March 1958, p. 32.
- Flight to the moon, April 1958, p. 32.
- Human crews for space ships, April 1958, p. 35.
- High-vacuum chamber, April 1958, p. 37.
- Laboratory for space research, April 1958, p. 37.
- We can't conquer space with missiles, June 1958, p. 20.
- NASA round-up, July 1958, p. 20.
- ARPA round-up, July 1958, p. 20.
- First space ship, X-15, July 1958, p. 35.
- Flight materials and structures, new era dawns for, Aug. 1958, p. 20.
- "Whiskers," a look at, Aug. 1958, p. 31.
- Gliding vehicles, high-speed, Aug. 1958, p. 34.
- NAS 16-man space science board, Sept. 1958, p. 14.
- Optimum paths to moon and planets, Sept. 1958, p. 18.
- What do you know about space?, Sept. 1958, p. 22.
- NASA act—"A historic step," Sept. 1958, p. 39.
- What power sources in space?, Oct. 1958, p. 24.
- Auguries of space flight, U.S.A., Oct. 1958, p. 38.
- Russian eye on space, Oct. 1958, p. 39.
- Amsterdam IAF Congress, Oct. 1958, p. 40.
- Peaceful talk of space, Oct. 1958, p. 40.
- Cosmonautics, Russian light on, Oct. 1958, p. 42.
- Answers to September space technology quiz, Oct. 1958, p. 56.
- A look ahead, Nov. 1958, p. 24.
- U.S. civilian space flight program, Nov. 1958, p. 30.
- Rocket engines for space flight, Nov. 1958, p. 37.
- Space flight, 1958, Nov. 1958, p. 46.
- 1958 Space legislation timetable, Nov. 1958, p. 49.

DRONES:
- Introducing the modern drone, June 1958, p. 22.
- Rocket propulsion for drones, June 1958, p. 24.
- Design criteria for drone rocket engines, June 1958, p. 27.
- Drones grow with weapon systems, June 1958, p. 30.
- Teal is a bird, June 1958, p. 31.
- Teal motor rundown, June 1958, p. 32.
- Drone radar and IR simulation, June 1958, p. 34.
- Scoring systems for missile evaluation, June 1958, p. 36.
- Combat surveillance and the drone, June 1958, p. 38.
- New drone guidance system, June 1958, p. 40.

EDUCATION:
- Why not astronautical engineers?, Sept. 1957, p. 52.
- Spawning ground for future scientists, Oct. 1957, p. 43.
- Why astronautical engineers?, Nov. 1957, p. 38.
- Space flight goes to school, Dec. 1957, p. 44.
- Space technology course, Dec. 1957, p. 44.
- Space age workshop, July 1958, p. 38.
- Educating youthful rocketeers, July 1958, p. 39.
- What do you know about space?, Sept. 1958, p. 22.
- Answers to September space technology quiz, Oct. 1958, p. 56.

ELECTRONICS:
- 'Brain' to map satellite orbit, Aug. 1957, p. 70.
- Spacistor, successor to transistor?, Sept. 1957, p. 34.
- Spawning ground for future scientists, Oct. 1957, p. 43.
- Electronics and the missile, May 1958, p. 20.
- Fundamentals of missile guidance, May 1958, p. 22.
- Electronic materials frontier, May 1958, p. 25.
- Radar, recent development in, May 1958, p. 28.
- Missile guidance, radio techniques for, May 1958, p. 30.
- Infrared missile guidance, May 1958, p. 33.
- Precision electronic equipment, May 1958, p. 41.
- Cures for which there are no diseases, May 1958, p. 41.
- Data processing in air defense systems, May 1958, p. 42.
- SAGE system, May 1958, p. 42.
- Drone radar and IR simulation, June 1958, p. 34.

FUELS:
- Propellants for tomorrow's rockets, Aug. 1957, p. 45.
- Fuels for the future, Nov. 1957, p. 35.
- Free radicals, Nov. 1957, p. 35.
- Recent advances, Jan. 1958, p. 34.
- Free radicals, A look at, Jan. 1958, p. 36.
- Solid propellants and the conquest of space, Jan. 1958, p. 39.
- Dual-thrust grain designs, March 1958, p. 26.
- I_{sp}: How high for chemical fuels?, Sept. 1958, p. 26.
- Cold propellants for hot performance, Sept. 1958, p. 28.
- Cryogenics, Sept. 1958, p. 28.
- Monopropellants, Sept. 1958, p. 34.
- Dark horse in propellant race, Sept. 1958, p. 34.
- Ramjet fuels: A brief survey, Sept. 1958, p. 36.
- A solid proposal, Sept. 1958, p. 38.
- Solids give liquids a boost, Oct. 1958, p. 30.
- Propellants and combustion, 1958, Nov. 1958, p. 56.

GROUND SUPPORT, HANDLING and LAUNCHING:
- Arctic tower, Oct. 1957, p. 66.
- Experimental missile firings: A functional analysis, Dec. 1958, p. 18.
- Atlas handling from factory to launch, Dec. 1958, p. 22.
- ICBM launch control, Dec. 1958, p. 24.
- Moon probe launch: What it takes, Dec. 1958, p. 26.
- Support systems for liquid engines, Dec. 1958, p. 28.
- AF logistics for ballistic missiles, Dec. 1958, p. 31.
- Universal engine handling equipment, Dec. 1958, p. 32.
- Toward universal missile test systems, Dec. 1958, p. 33.
- GSE design criteria, Dec. 1958, p. 34.
- Early testing means better ground support equipment, Dec. 1958, p. 36.
- Corrosion prevention for Polaris, Dec. 1958, p. 38.
- Polaris launching system, Dec. 1958, p. 40
- ASM handling and launching, Dec. 1958, p. 42.

GUIDANCE:
- Fundamentals of missile guidance, May 1958, p. 22.
- Missile guidance, radio techniques for, May 1958, p. 30.
- Infrared missile guidance, May 1958, p. 33.
- ICBM inertial guidance, May 1958, p. 45.
- Instrumentation and guidance, 1958, Nov. 1958, p. 54.

HUMAN FACTORS:
- Capt. Kittinger's 96,000-ft ascent, Aug. 1957, p. 56.
- On top of the world, Aug. 1957, p. 56
- Operation Farside, Sept. 1957, p. 12.
- First space man, Nov. 1957, p. 30.
- Maj. Simons ascent to 100,000 ft, Nov. 1957, p. 30.
- Weightlessness, Nov. 1957, p. 32.
- Synthetic atmospheres for space ships, Nov. 1957, p. 48.
- Human factors and space cabins, Jan. 1958, p. 42.
- Society and space exploration, Feb. 1958, p. 20.
- Life in Sputnik, Feb. 1958, p. 38.
- Flight to the moon, April 1958, p. 32.
- Farrell space voyage, April 1958, p. 32.
- Human crews for space ships, April 1958, p. 35.
- Laboratory for space research, April 1958, p. 37.
- High-vacuum chamber, April 1958, p. 37.
- Human factors, 1958, Nov. 1958, p. 58.

IGY:
- Who's who in the IGY, Aug. 1957, p. 60.
- First rocket firing, Aug. 1957, p. 64.
- Sounds off, Aug. 1957, p. 64.
- Vanguard instrument package, Aug. 1957, p. 66.
- 'Brain' to map satellite orbit, Aug. 1957, p. 70.
- Geodesy comes of age with Vanguard, Aug. 1957, p. 71.
- Shooting rockets in the sub-Arctic, Sept. 1957, p. 38.
- Notes, Sept. 1957, p. 86.
- Rocket and satellite technology in IGY 1982–83, Oct. 1957, p. 16.
- Arctic tower, Oct. 1957, p. 66.
- Notes, Oct. 1957, p. 76.
- Russians talk about rockets at IGY conference, Nov. 1957, p. 85.
- Push-button rocketry, Feb. 1958, p. 44.
- Navy IGY rockets, Feb. 1958, p. 44.
- IGY program to date, March 1958, p. 21.
- Russian eye on space, Oct. 1958, p. 39.
- Harvest from the IGY: Earth satellite and rocket research programs, Nov. 1958, p. 34.

INSTRUMENTATION:
- Vanguard instrument package, Aug. 1957, p. 66.
- Soviet satellite instrumentation, Feb. 1958, p. 32.
- Microlock, how it works, March 1958, p. 25.
- Fundamentals of missile guidance, May 1958, p. 22.
- Computers and simulators aid in missile development, May 1958, p. 38.
- Data processing in air defense system, May 1958, p. 42.
- SAGE system, May 1958, p. 42.
- ICBM inertial guidance, May 1958, p. 45.
- Instrumenting for large-scale captive missile tests, Part I, May 1958, p. 48; Part II, Oct. 1958, p. 35.
- Drone radar and IR simulation, June 1958, p. 34.
- Radioactive tracers—new aid to rocket instrumentation, July 1958, p. 30.
- Instrumentation and guidance, Nov. 1958, p. 54.

MAGNETOHYDRODYNAMICS:
- Introducing magnetohydrodynamics, Oct. 1958, p. 18.

Index to ASTRONAUTICS Vols. 2-3

(August 1957 through December 1958)

SUBJECTS

AMATEUR ROCKETRY:
- Aid for basement rocketeers, Feb. 1958, p. 23.
- Educating youthful rocketeers, July 1958, p. 39.

ARPA:
- National astronautical program begins to take shape, July 1958, p. 20.
- Round-up, July 1958, p. 20.

ARS:
- 1957 Annual meeting number, Dec. 1957.
- ARS urges national space flight program, Jan. 1958, p. 18.
- 10,000th Member, Nov. 1958, p. 36.
- Thirteenth time out, Nov. 1958, p. 38.
- 1958—A year of growth, Nov. 1958, p. 44.

ASTRONAUTICS:
- It's really empty space, Sept. 1957, p. 27.
- Why not astronautical engineers?, Sept. 1957, p. 52.
- Anthropology of astronautics, Nov. 1957, p. 26.

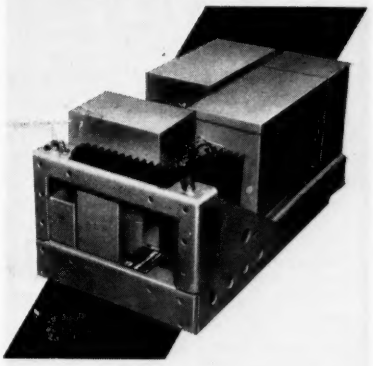
New ADVANCED DESIGN "B" LINE 60 AND 400 CPS



HIGH POWER TRANSISTOR MAGNETIC SERVO AMPLIFIER

For AC servo motor control — 50 watts to 3000 watts

FEATURING
- Extreme reliability
- Wider ambient temperature range
- Faster response
- Smaller size at higher power ratings
- Higher gains
- Improved core design
- Silicon rectifiers used exclusively
- Greater flexibility
- Ideally suited for operating with Diehl Servo Motors

Signal Input AC or DC
Military Specifications
Provisions for System Feedback • Completely Static • Output 115V AC Phase Reversible

For complete 60 cps and 400 cps specs request Bulletin S-961.
